LET'S GET ACQUAINTED

There are listed in this 1959 catalog 54 kinds of evergreens, 62 kinds of deciduous trees, 196 shrubs, 33 fruits, 34 vines, 159 roses and 261 perennials, a total of 799 different plants, not counting the lilies, dutch bulbs, chrysanthemums, oriental poppies and iris that we will have in season or the many small lots of plants growing in the nursery. We believe that this is the largest list of nursery stock ever assembled in the Rocky Mountain area.

This large list may not be profitable to us but we believe that it will make it unnecessary for any plant lover in the area to send afar to questionable sources for the ornamental plants that they want.

In addition to living plants for every purpose we will have the following things to help you all have good gardens.

FERTILIZERS—Morgro, Velvagreen, Ortho, Rapidgro, Hellergro, Fish Emulsion, Ammonium sulphate, Urea, Treble superphosphate, and special compounds.

PEAT MOSS and LEAF MOLD—In bags, bales or bulk.

GRASS SEED—Kentucky Blue, Merion, Crested Wheat, Perennial Rye, special mixtures.

GARDEN TOOLS—Hoes, rakes, spades, clippers, pruning saws, edgers, trowels, sprayers, and dusters of many kinds.

GARDEN HOSE—In rubber and plastic in various sizes.

SPRINKLERS—Rainbird, Rainking and other good kinds.

PEST CONTROLS—Insecticides for every bug, fungicides for diseases, weedicides for controlling weeds. Sprays and dusts.

BIRD SUPPLIES—Bird baths, bird seed, bird houses.

POTS AND POTTERY—In many sizes, kinds, and colors. Wooden tubs and planters. Plastic and metal planters. Wrought iron brackets.

FLOWER ARRANGING ACCESSORIES—Containers, holders, tape, foliage cleaners, dried materials, Christmas ornaments and other seasonal things.

INDOOR PLANTS-Many kinds for indoor planters and potted flowers in season.

INDIAN JEWELRY—Hand made rugs and pottery picked up in out-of-the way places on our desert trips.

PICTURESQUE WOOD-Drift wood, timberline wood.

ROCKS—For rock gardens selected and placed on order.

LANDSCAPE SERVICES

Our main job is to supply you with every ornamental plant that you may want.

We do not have men to do PLANTING or maintenance work, but can refer you to reliable men who can do such things for you.

We can personally help you with your PLANNING problems, except during the spring rush. We do not give "free" plans as an inducement to buy from us, but charge by the hour for all work done. This is much fairer both to you and to us. Accurate but not elaborate plans are inexpensive and may save you much by your avoiding unsuitable material or the improper placing of it.

PAYMENT

Our prices are based on a cash business. We cannot give extended credit, and any arrangement to pay bills by check later is strictly an accommodation. We cannot wait for our customers to see if the plants are going to grow before paying for them, and we do not feel any responsibility for replacement of plants that fail to start growth if the original bill has not been paid promptly.

GUARANTEE

To guarantee that a plant will live for any length of time after we sell it would be foolish and expensive. It would be just as silly to guarantee a dog or goldfish to live to a ripe old age after being sold. We would have to raise our prices to be able to replace every plant that some careless gardener let die. If plants are guaranteed to grow for months after leaving our care it simply means that the careful gardeners are paying an extra price to cover the losses of the poor gardeners. We DO NOT guarantee plants to live for any period of time after we sell them.

We DO guarantee that all the plants that we sell are live and healthy AT THE TIME THAT WE deliver them to our customers. Since it is almost impossible for the average person to tell whether a dormant plant is alive or not at the time that they plant them, we will replace, 100%, any plants which do not make satisfactory growth by the middle of July, where they have been given suitable care and it appears that the plant was not in good condition when sold.

Since anyone can see the condition of potted and canned plants, which are growing when sold, we will not replace any of these which are allowed to die later.

Campanula, BELLFLOWER	
C. carpatica, CARPATHIAN BELLFLOWER—Blue, June 8"	.60
C. gargantica—Dense clusters, bright blue stars with white eye, for rock walls C. persicifolia, MISTY MORN—Double, lavendar blue, tall	
Carnation—See Dianthus	
Chrysanthemum	
Most of our chrysanthemums are sold in the fall, but we will have a good assort of cushion mums and other types in a variety of colors in spring, also. C. maximum, SHASTA DAISY	
CONQUEROR—Largest white, 2½ foot high	
DOUBLE FRINGED GIANT—New, large, semi-double to double	
MARCONI—Double frilled	
MOUNT SHASTA—Double with crested centers WIRRIL PRIDE—White with yellow centers, English	
Cimicifuga, SNAKEROOT	
C. racemosa—Tall spikes, white flowers, for shade	1.10
Clematis	
C. mandchurica—Fragrant white flowers in July	.75
Convallaria, LILY-OF-THE-VALLEY	•••
C. majalis—Low, white flowers for shade	.35
Coreopsis, TICKSEED	00
C. verticillata, GOLDEN SHOWERS—Rich golden-yellow 24" C. SUNBURST—Semi-double golden yellow	.55
Cortaderia, PAMPAS GRASS	
C. argentea—Tall silvery plumes (divisions)	.75
Delphinium	
D. pacific hybrid, BLUE JAY—Medium to dark blue with dark bee	.60
D. pacific hybrid, GALAHAD—Giant, pure white	
D. pacific hybrid, GUINIVERE—Light pink lavendar with white bee	60
D. pacific hybrid, SUMMER SKIES—Large, sky-blue with white bee	60
Dianthus, HARDY CARNATION	
D. LUCIA—Rose-pink with salmon. Fragrant	
D. SYLVIA	60
D. CRIMSON KING—3 inch crimson flowers on 12" stems, all summer	55
Dianthus, PINKS	-
D. barbatus, MIDGET—Double, various colors, very dwarf	
D. EVANGELINE—Compact, double pink, all summer12"	.90
D. ROSE CUSHION—Double pink flowers 3" D. TINY RUBIES—A real gem, miniature carnations on a compact mound	.55
of foliage	.60
Dicentra, BLEEDING HEART	
D. exima—Fringed, dwarf, pink, blooming all summer	75
D. spectabilis—Old-fashioned, pink bleeding heart	
Dictamnus, GAS PLANT	
D. fraxinella—Tall, pink, summer, 2½'	1.10
D. f. alba—Tall, white, fragrant	
Echinops, GLOBE THISTLE	
E. TAPLOW PURPLE—Deep blue, tall, hardy	1.00

Epimedium, BARRENWORT E. macranthum lilacinum—Ground cover and rock plant, blue E. rubrum—Ground cover, red flowers in May and June	
E. himalaicus—Giant flower stalks often 8 feet tall, white	3.00
E. amethystinum—Deep blue, 2½ feet, July-September	45
Eulalia E. japonica zebrina, ZEBRA GRASS—Coarse, striped grass, 6 foot Euonymus	.45
É. acuta—Evergreen ground cover for shade places	1.50
Eupatorium, HARDY AGERATUM E. coelestinum, BLUE BONESET—Rosy-purple, very hardy	75
E. myrsinites—Bluish-gray foliage, large yellow flowers E. polychroma—Lemon-yellow flowers in June	
Festuca, FESCUE F. glauca, BLUE FESCUE—Compact clumps of blue grass for rock garden or border	45
Funkia (Hosta), PLANTAIN LILY F. glauca—Large blue-gray leaves, 3 foot, August Large	
F. subcordata grandiflora—Pure white, August, 2 foot F. sp. THOMAS HOGG—Silver-edged leaves, lavendar F. variegata—Wavy leaves with silvery white, lilac	1.35 1.50
Gaillardia, BLANKET FLOWER G. sp. BURGUNDY—Large-flowered, burgundy-scarlet G. sp. SUN GOD—Yellow all summer	60
Geum, AVENS G. LADY STRATHEDEN—Golden-yellow, 2 foot, all summer G. MRS. BRADSHAW—Double, fiery-red	
Gypsophila, BABY'S BREATH G. perfecta—Large double white G. repens rosea—Pink, trailing, for rock gardens	
Helenium, SNEEZEWEED H. MOERHEIM BEAUTY—Tall, yellow, sunflower	.75
H. peregrina—Large mahogany edged yellow, late	
Helleborus H. orientalis atrorubens, LENTEN ROSE—Chocolate-purple to greenish-purple	
blooming in early springH. niger, CHRISTMAS ROSE—White flowers in December	$\frac{2.00}{1.25}$
Hemerocallis, DAY LILY H. sp. BARONET—Bright orange-red, 2 foot H, GOLD DUST—Low, deep yellow, early H. HYPERION—Light yellow, large, 3½ foot	.90 1.00
H. KWANSO flora plena—Large, double, golden-bronze H. LEONIAN HYBRIDS—Mixed colors H. LINDA—Gold with bronzy-pink, ruffled, all summer	.75 .75 .90
H. MRS. W. H. WYMAN—Pale yellow, tall, late H. PATRICIA—Large, pale yellow, fragrant	.75

Heuchera, ALUMROOT	
H. sp. BRESSINGHAM HYBRIDS—Various shades	
H. PLUIE DE FEU—Coral-red, 18 inches, all summer	.75
H. rosamunda, CORAL BELLS—Coral-pink, 18 inch Large	
H. WHITE CLOUD—White flowers	.60 .75
Hibiscus, MALLOW	
H. moscheutos—Large flowered in separate colors, red, pink and white	.90
Iberis, CANDYTUFT	
I. sp. LITTLE GEM—White, compact, 6 inch, June	.70
I. PURITY—New, improved, white	.75
I. gibraltarica—Lavender, 8 inch, May	.45
Incarvillea, TRUMPET FLOWER	
I. delavayi, HARDY GLOXINIA—Rosy-pink, May-June, 18"	.60
I. grandiflora—Fuchsia-purple, large	.60
Iris	
germanica, BEARDED IRIS—We will have a large assortment of the good of	older
varieties and some of the different new ones. These are usually sold in August but	
be moved in the spring if wanted.	
I. pumila, DWARF—Early. We will have these in several colors	.40
I. sibirica, SIBERIAN	
BLUE CHARM—A beautiful, soft, sky-blue, 4 foot	.55
CAESAR'S BROTHER—Rich pansy-violet on 2½ foot stems	.55
LADY NORTHCLIFFE—Bright violet with veined white throat	.55
SNOW QUEEN—Snow-white, grass-like foliage	.55
Lavandula, LAVENDER	
L. vera—Fragrant, blue flowers in July and August, herb	.60
Leontopodium, EDELWEISS	
L. alpinum—Low wooly, rock plant from Switzerland	1.00
Liatris, BLAZING STAR, GAYFEATHER	
L. sp. COBALT HYBRID—Tall, late, new	.55
L. pycnostachys, KANSAS GAYFEATHER—Tall spikes of rich purple in July	.55
L. SEPTEMBER GLORY—Immense stalks to 6 feet in August, Field clumps	1.00
Small nots	60
L. SILVER TIPS—Light lavender, early blooming	.55
L. WHITE SPIRES—5 foot stems of white flowers in Sept. Field clumps	1.00
Small pots	.60
Linum, FLAX	
L. flavum, GOLDEN—Yellow, 12 inches, midsummer	
L. narbonnense—Sky-blue, all summer	.55
Lithospermum, GROMWELL	
L. prostratum, HEAVENLY BLUE—Low, woody perennial for rock gardens	2.00
Lobelia	
L. cardinalis, CARDINAL FLOWER—Fiery cardinal red, 2 foot, moist, shady	.60
Lupinus, LUPINE	
RUSSELL HYBRIDS—Various colors, 3 feet	1.00
Lychnis, ROSE CAMPION	
L. chalcedonica, MALTESE CROSS—Bright scarlet, July, 2 foot	.45
L. viscaria splendens, CATCHFLY—Brilliant rose-red, 2', July	
Lysimachia	
L. vulgaris, LOOSESTRIFE—Tall, 2 foot	.50
Lythrum	.50
ROBERTS—Low, clear pink, summer	.70
Mertensia, BLUEBELLS	
M. virginica—Blue shading to pink, for shade, spring	45
	UF.
	

Monarda, BEE-BALM
CROFTWAY PINK—Rose pink, 2 foot stems, part shade55
CAMBRIDGE SCARLET—Brilliant crimson, June to August
M. didyma hybrida, SUNSET—Deep purplish-red
Myosotis, FORGET-ME-NOT
M. palustris—Everblooming, rich blue flowers
Nepeta, CATMINT
N. mussini—Gray foliage, blue flowers, for hot places55
Nierembergia, CUP FLOWER
N. rivularis—Dwarf, trailing alpine with creamy white flowers
Oenothera, EVENING PRIMROSE
O. missouriensis—Large yellow bloom, 3-4" across, prostrate75
Osmunda cinnamomea
CINNAMON FERN—Tall, for shade1.25
Paeonia, PEONY
Assorted colors and kinds available in October 1.00 to 3.00
Papaver, ORIENTAL POPPY
P. orientale—A great variety of colors ready late August
Penstemon, BEARDTONGUE
P. cyonanthus—Heavenly-blue flowers on 2 foot stems
FIREBIRD—Foxglove-like ruby-crimson flowers all summer
PINK BEAUTY—Pastel pink with silvery sheen, 30 inch
ROSE ELF—Clean, shell-pink, new
Phlox, amoena
AMOENA—Clear pink, early, upright, 12 inch
Phlox decussata, HARDY GARDEN PHLOX
AFRICA—Carmine red with blood red eye
BORDER QUEEN—Low, watermelon pink
CAROLINE VANDENBURG—Clear, lavendar blue
DAILY SKETCH—Light salmon-pink with crimson eye
ELIZABETH ARDEN—Very large florets of delicate pink
HARVEST FIRE—Large, fiery, salmon-orange, late
HAUPTMAN KOHL—Blood red, 3 foot
LEO SCHLAGETER—Crimson scarlet
PRIME MINISTER—New English phlox, white with crimson eye
RHINELANDER—Salmon-pink field clumps 1.00
SIR JOHN FALSTAFF—Rich, salmon pink, outstanding
SNOWCAP—Best white for us, an Andrews introduction, early
TENOR—Rose red with scarlet. Flowers early and again late
VON HOCHBERG—Black red, tall, midsummer
WHITE ADMIRAL—New, enormous heads of snowy white, fragrant
WILLIAM KESSELRING—Large, violet with white eye, low
Phlox subulata, TRAILING PHLOX
ALEXANDER'S SURPRISE—New, dark pink, blooms fall and spring60
ALEXANDER'S WILD ROSE—Vigorous, sometimes fall bloom
BLUE HILL—Light blue, in spring and fall, compact
CRIMSON BEAUTY—Large flowers of brilliant red
LILACINA—Low, lilac colored
WHITE DELIGHT—Largest white on bright green foliage
Phlox, Stolonifera
BLUE RIDGE—Ground cover, 3", deep blue flowers
Platycodon, BALLOON FLOWER
P. grandiflora, blue—campanula-like flowers on tall stems
P. g. alba—White
P. g. pink
P. g. double blue—Very showy, unusual

P. larpente (Cerastostigma plumbaginoides) 12 inch, deep blue, late	
Polygonum	.55
P. reynowtria, DWARF LACE PLANT—Hardy ground cover, pink	.70
Potentilla, CINQUEFOIL	
P. nepalensis, MISS WILMOTT—New 12 inch clumps of strawberry-like foliage with carmine-red flowers	.90
Poterum, BURNET	
P. obtusum—3 foot spikes of rose-pink flowers	1.25
Primula, PRIMROSE	
P. colossea mived. Vellows, pinks, copper and made	1.25
P. colossea mixed—Yellows, pinks, copper and red P. sp. GIANT BOQUET—New, large flowers in various colors	.70
Pulmonaria, LUNGWORT	.55
P. saccharata—Silver-spotted foliage and Mertensia-like flowers	.60
Pyrethrum (Chrysanthemum) PAINTED DAISY	
P. coccineum, ROBINSON DARK CRIMSON—Single, crimson-red	.75
Rosemarinus, ROSEMARY	
R. officinalis—Herb with fragrant leaves	.90
Rudbeckia, CONEFLOWER	
R. sp. THE KING—Old-rose with dark center, tall, late	.75
R. WHITE LUSTRE—Pure white with bronze centers	.75
Salvia, SAGE	
S. azurea—Tall, late, gray foliage, blue flowers	.75
S. pitcheri—Tall, deep blue, in fall	.60
Santolina, LAVENDAR COTTON S. incana—Low, silvery foliage, small yellow flowers	=0
	.50
Saponaria, SOAPWORT S. ocymoides, ROCK SOAPWORT—Spreading, bright pink flowers all summer	.55
Scabiosa, PINCUSHION	
S. caucasica—Wavy petals of lavendar-blue all summer	.60
Scutellaria, SKULLCAP	
S. baicalensis cordifolia—Low, spreading, small blue snapdragons	1.25
Stokesia, STOKE'S ASTER	
S. BLUE DANUBE—Large deep blue daisy	.70
Sedum, STONECROP	
Low, hardy succulents for ground cover and rockeries	
S. acre, GOLDMOSS—Yellow, 4 inch, June S. kamchaticum, ORANGE—Bright orange flowers, 6 inch, June-Sept	.45 .45
S. opsinifolia—Foliage light-green turning red in fall	.45
S. reflexum, JENNY—Best ground cover, 6 inch, July	
S. sarmentosum, STRINGY—Yellow, 4 inch, June	.45
S. sexangulare, HEXAGON—Yellow, 5 inch, June	
S. spectable, SHOWY RED—Crimson 10 inch, August	
S. spectable, SHOWY WHITE—white flowers, tall S. spurium, TWOROW—PURPLE BEAUTY—Large umbels of deep-red flowers	.50 .75
S. stahli, STAHL—Compact growth, crimson foliage, 4 inch	.45
S. stoloniferum, RUNNING—Trailing, purplish-pink, 6 inch, July	.45
S. ternatum, MOUNTAIN—Pure white, 4 inch, May	.45
Stachys, WOUNDWORT, BETONY	
S. lanata, WOOLY—Silvery-white, wooly foliage, small purple flowers	.45
Statice, SEALAVENDAR	
S. dumosa—Silver-gray flowers, 30 inch, July-August	.75
S. latifolia (Armeria pseudoarmeria) Lavendar cloud of tiny flowers, late	.60
27	

Excellent for rockeries in cracks and hot spots	
S. alberti—Pale yellow flowers, sage green leaves, 2-3 inches	.45
S. arenarium, SAND—Small green rosettes	.45
S. bouliacianum—Green rosettes with reddish brown tips	.45
S. comolli—Small rosettes, green	.45
S. doellianum—Hairy rosettes tipped red, flowers red	.45
S. fimbriatum—Rosettes green, margins deflexed, hairy	.45
S. glaucum, HEN & CHICKENS—Glaucus rosettes with reddish-brown tips	.45 .45
S. mettenianum—Short grayish-green leaves, deep-rose flowersS. montanum—Green rosettes, bright mauve-red flowers	.45
S. reginae amaliae—Purplish-brown tips, pale yellow flowers	.45
S. rupestris—Pale green rosettes, distinct red-brown tips	.45
S. ternatum—Erect green rosettes, distinct red-brown tips S. ternatum—Erect green rosettes, tipped red, red center	.45
	.TJ
Thalictrum, MEADOWRUE	00
T. sp. LAVENDAR MIST—Tall stems, lavendar flowers, nice foliage	.90
T. glaucum, DUSTY—Blue-gray columbine-like foliage, yellow bloom	1.00
Thymus, THYME	
T. citridorous, LEMON-SCENTED THYME—Low, creeping, good for between flagstones	.70
T. lanuginosus, WOOLY—Gray, wooly foliage with bright-pink flowers	.70

DUTCH BULBS

Around the first of October we will have available a large assortment of bulbs from the best growers in Holland and Oregon.

Our list will include some of the best from the oldtimers and many of the recent introductions. There will be all types of tulips including the exciting species tulips as well as Narcissus in great variety, Hyacinths, Scillas, Crocus, Grape Hyacinths and many others.

LILIES

Sure, you can grow lilies here. Many good gardeners have done so and we have proven it in our own garden. In the fall we will take orders for the hardy hybrids to be sent direct to you from the grower in Oregon as soon as they are dug. Lilies are best handled this way for they are never completely dormant as are such bulbs as tulips and should be replanted as soon after they are dug as possible.

MINIATURE ROSES

Because the beautiful little miniatures are often grown as pot plants and are usually propogated in the greenhouse we do not list them with the other roses. They will survive out doors, however under the same conditions and care as the Hybrid Teas. The tiny little bloom are always thrilling when seen on the plants and may be cut for miniature flower arrangements. We will have available in pots from the greenhouse, about the first of March, a good assortment of the better old varieties and many exciting new ones.

Some standard varieties are: Cinderella, double white. Midget, double pinky-red. Red Imp, double bright-red. Sweet Fairy, fragrant Appleblossom pink. Robin, one inch red bloom.

Among the new ones are Dian, fragrant double light-red; Little Buckaroo, velvety-red; Westmont, bright-red; Bit 'O Sunshine, buttercup yellow; Little Scotch, soft butterscotch; Mary Haywood, new, double-pink; Pink Joy. fragrant pink; White Aster, soft pink.

Pink Cameo, Candy Cane, Magic Wand and Papoose are interesting climbing types.

You Save Us Money and We Will Save You Money

We try to set our prices to cover the actual cost of the materials and the handling of them. We do not include an extra price to everyone to cover the extra services of a few, such as "free" plans, deliveries, extended accounts or "Insurance".

So, we will allow a 10% reduction on all items taken "3 or more of a kind" at any time—or a 10% discount on all orders of \$25.00 or more given before March 15 and paid for before April 15.

Our GUARANTEE is only as to the live condition of the plants when they are delivered to you and is not intended to be "Insurance" against all abuses or weather conditions. If you want this unlimited guarantee for one year, we will give it for an extra 10%.

Plants priced "Not Guaranteed" will be included with other guaranteed plants for an additional 20%.

PLEASE REPORT all plants that do not make satisfactory growth by July 15. Give us this statement in writing, accompanied with your invoice and we will keep on file and replace when you call for it the next spring.

NATIVES FOR DIFFICULT PLACES

Some of our native plants which have accustomed themselves to our peculiar climate over many thousands of years are often just the things for that difficult corner, where it is not possible to give them much water or attention. The ones mentioned below are all listed in their appropriate places elsewhere in this catalogue:

Ponderosa Pine—A tall massive tree tolerating drouth. Colorado Juniper—Generally a symmetrical, tall tree. Oneseed and Utah Junipers—Dwarf, round headed evergreens. Pinion Pine—A small evergreen growing in dry places. Low Juniper—Low and spreading; prefers some shade. Common Hackberry—A tall shade tree tolerating much drouth. Colorado Hawthorn—A small tree beautiful in flower and fruit. New Mexico Locust—Tough, spreading, small tree, Good bloom, Silver Buffaloberry—Gray foliage, red berries, spreading. Serviceberry—Tolerating drouth. Edible fruit. Indigobush Amorpha—Tall, loose shrub with indigo flowers. Mountainmahogany—Grows in dry places. Fuzzy seed tails. Baccharis—Native in Baca County. Like a tall rabbitbrush. American Wild Plum—Forms thickets. Good bloom and fruit. Western Chokecherry—Good bloom and fruit. Spreads. Mountain Privet—Tall privet-like shrub with blue berries. Colorado Red Osier Dogwood—Red stems, interesting fruit. Ramaley Ninebark—Tall shrub with white spirea-like flowers. Silverberry—Gray foliage, spreading, very hardy. Golden Currant—Good bloom and fruit. Grows anywhere. Thimbleberry—One of the best. Bloom like single white roses. Skunkbush Sumac—Very tolerant of difficult places. Bluestem Willow—Needs some water, but very hardy. Sand Cherry—Good fruit. Medium height. Rocky Mountain Sumac—Low, spreading, good fall color. Leadplant—Low, gray foliage and violet flowers. Bush Cinquefoil—Low, neat, yellow flowers all summer. Wild Roses-Pink flowers, red fruits, spreading, low. Wild Red Raspberries—Low, spreading, edible fruit. Salmonberry—Low, spreading, immense leaves. Soapweed—Evergreen bayonets, beautiful flowers, very hardy. White Clematis—Climbing shrubs and fences, fuzzy seed heads. Above more or less in order of their height.

PLANTING INSTRUCTIONS

We are very careful to protect the roots of our plants while in our care and when delivered to you. You should be careful that the roots are not exposed to drying air or sun until they are planted back in moist soil. EVEN 5 MINUTES of exposure will seriously damage many plants.

It is very important to dig a good sized hole to receive the roots of a plant, and remember that the harder the soil is to dig the more important it is that an especially large hole be dug. If very poor soil is encountered in digging a hole it would be well to discard this soil and borrow some good top soil to backfill the hole. It is usually most valuable to mix about ¼ peat with the backfill soil so that moisture may be more readily retained around the roots and so that the soil will be loose enough to encourage root growth. Do NOT put fertilizer of any kind in contact or near the roots of a newly transplanted plant. SMALL amounts of manure or commercial fertilizer mixed thoroughly in the soil back several inches from the roots may be beneficial if done carefully.

Plant all your plants at approximately the same depth as they originally grew in the nursery. This can usually be determined by a difference in color and texture of the bark above and below the ground line. Fill in the loose soil around the roots while they are held in a natural position. After the hole is filled, then run the hose down through the loose soil to the bottom of the hole and soak from the bottom up, while shaking the plant and holding it at the proper level. More soil can then be filled around the plant to make the surface level, or in the case of plants planted outside lawn areas, a low dyke can be left to facilitate later waterings. Don't tramp the soil when backfilled unless it is moist and it is impossible to water in immediately.

Most woody plants such as trees and shrubs should be thinned or cut back at the time of planting. This allows the restricted root system to supply more food to the remaining buds and will usually result in greater growth by the end of the season.

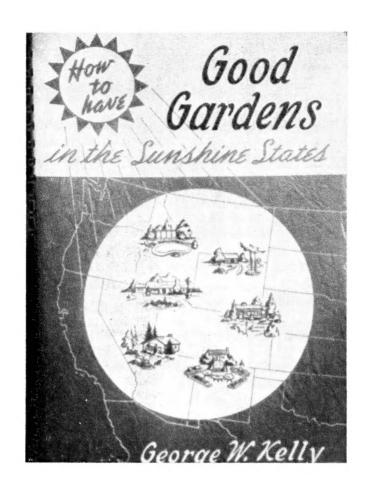

Do not water frequently and shallowly, thinking that this will help the plant to become established. Often this is worse than not watering enough. Soak THOROUGHLY when you do and then leave it go until the soil begins to become dry underneath. Do not be governed by the appearance of the surface of the soil. If you must have rules for watering a new plant make it every ten days, but it is best to dig in occasionally and see when water is really needed. Some hard-to-start plants like Honeylocust, Hackberry and Hawthorn will be helped to start by wrapping the trunk and sprinkling over the top, frequently. This is different from shallow and frequent watering of the SURFACE of the soil.

Roses should be handled as above but it is well to cut them back to about 8 or 10 inches and hill them up with good soil for half this distance until new growth starts. It is generally accepted practice to plant the graft on a rose about one inch under the soil level. Roses will grow in full sun, but prefer about half to three-fourths sun and some protection from wind. Directly on the south of a house would usually be too hot.

In planting balled evergreens the hole should be dug to the exact depth required, but 6 to 12 inches larger than the ball. Loosen the bottom soil so that the tree can be properly plumbed after being placed in the hole, then tamp soil under the ball to keep it in position. Fill in loose soil as with deciduous plants, water in and then loosen or cut off the burlap just around the top of the ball and finish filling the hole.

Tall shade trees may often need bracing to prevent wind damage until new roots are established. Wrapping the trunks of such tender barked trees as Mountainash and Linden is often very helpful.

Unless plants are handled properly as explained above they can not be expected to start into new growth normally.

Every good gardener will want a copy of George Kelly's new book, "HOW TO HAVE GOOD GARDENS IN THE SUNSHINE STATES." This has all the valuable information from the old book, "Rocky Mountain Horticulture Is Different" with an equal amount of additional garden information. There are hundreds of new illustrations, many in full color, to show how to make more enjoyable gardens.

TEN THOUSAND copies of the old book sold in the last few years. Every gardener in the Rocky Mountain West will want the new book, for it is the only book of its kind written especially for this area of little rainfall and much sunshine.

For sale at all book stores and garden shops.

Get a copy from the Cotttonwood Garden Shop and we will autograph it for you. Every good gardener will want a copy of George Kelly's new book, "HOW TO HAVE GOOD GARDENS IN THE SUNSHINE STATES."
